## Spring Forum

Oxford 2023

In partnership with:

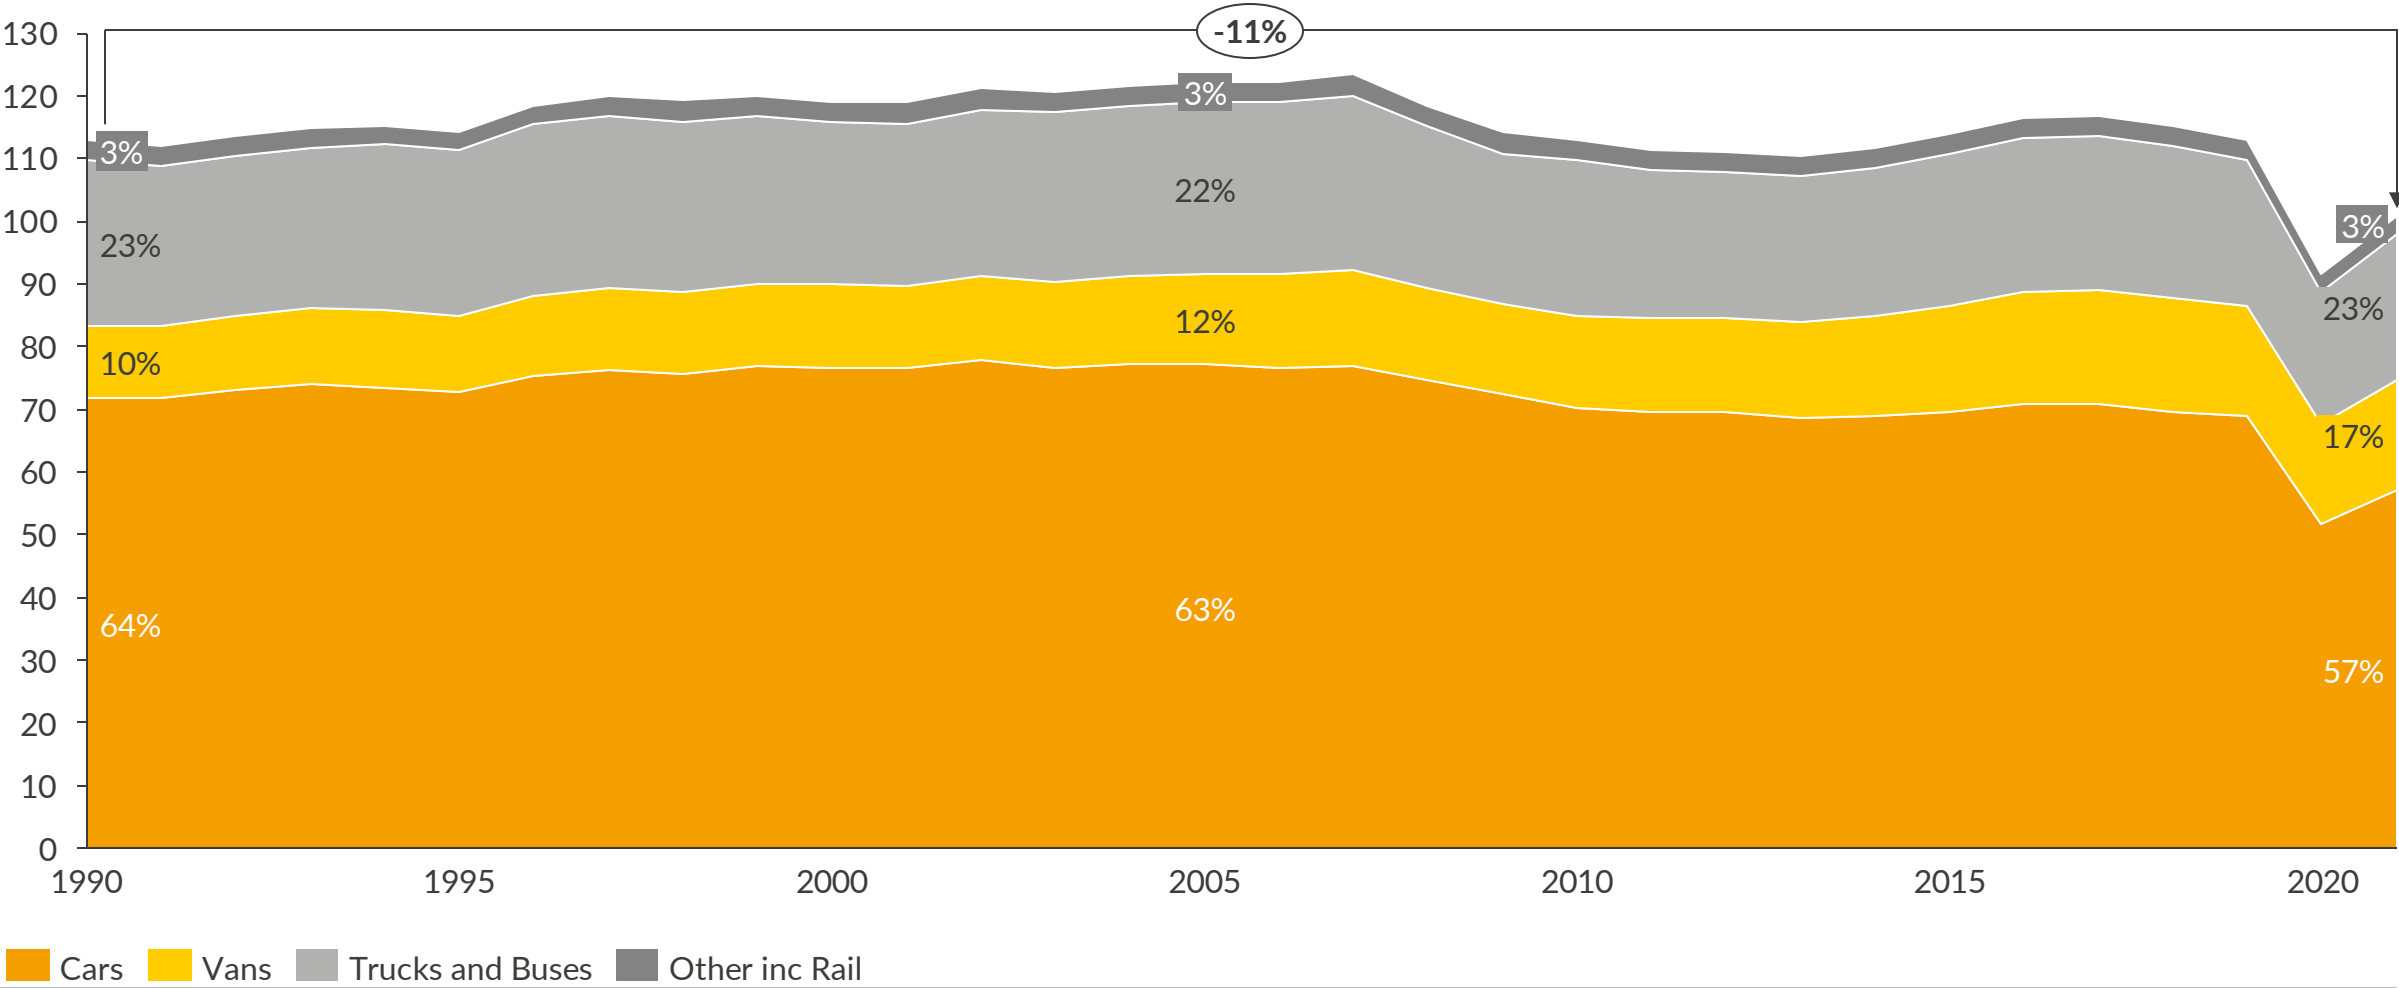

Engineer - Install - Maintain

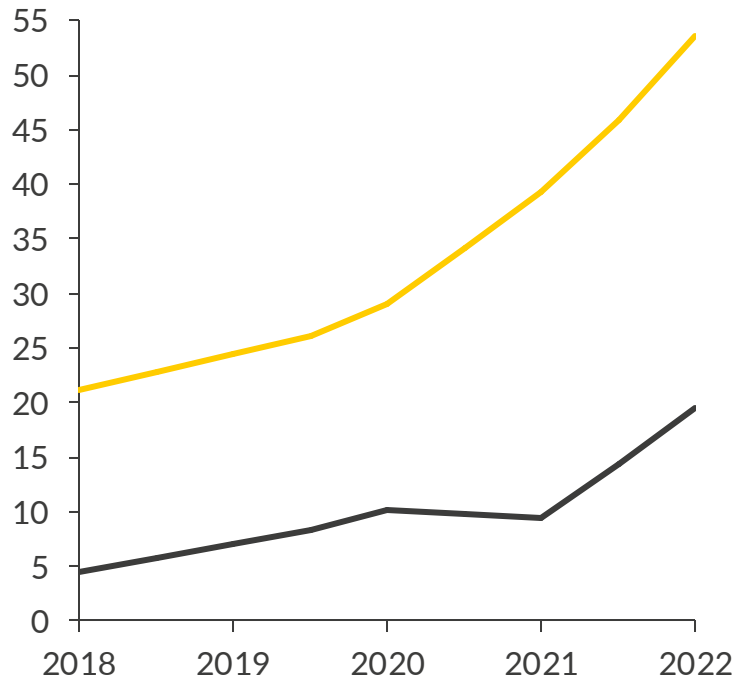

# UK surface transport emissions were roughly flat from 1990-2019, then down 10% since lockdown; vans are increasing their share of emissions

GHG emissions – UK surface transport  
MtCO<sub>2e</sub>

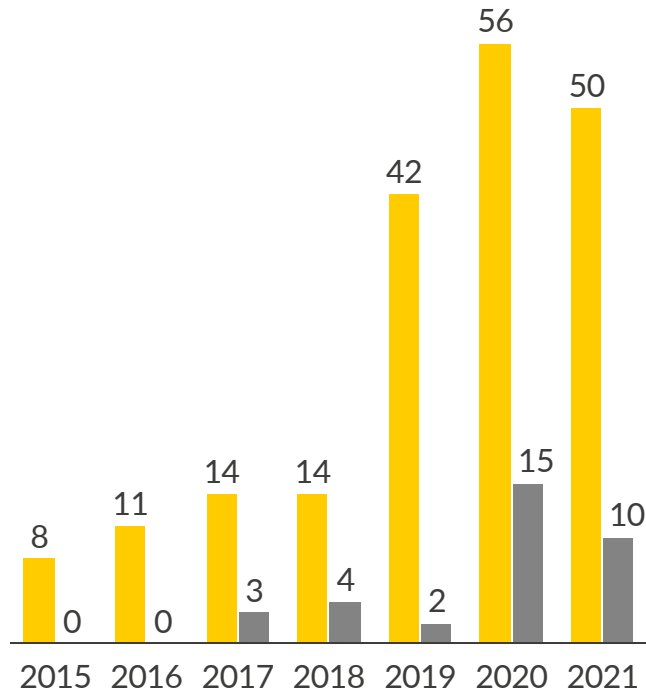

# Lots of factors are coming together making EVs the first choice for many in the UK...

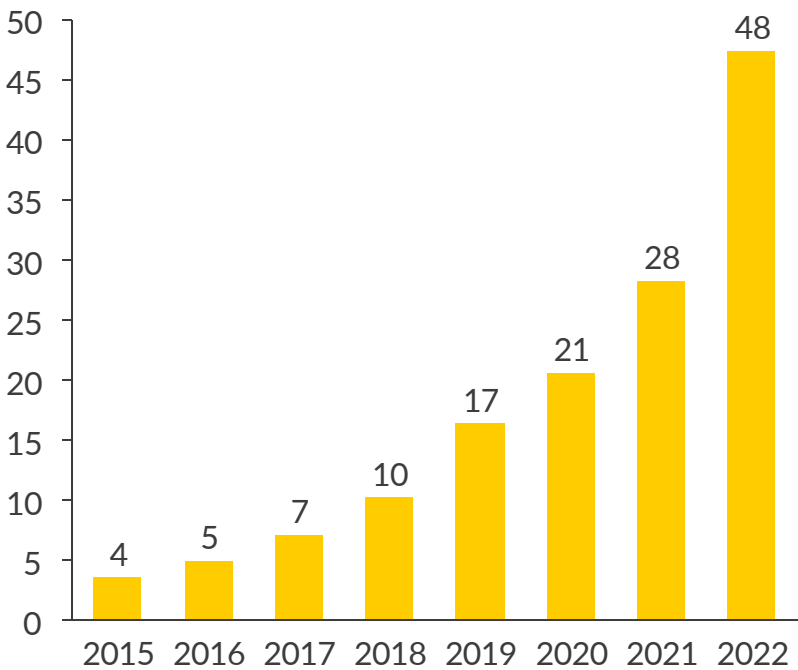

Intentions of those planning to purchase a vehicle %

Number of new EV models coming to market

Number of public charging points thousands

— % planning to choose hybrid or electric  
— % planning to choose battery-electric

■ Cars  
■ Vans

...including this guy !
